Code deployment 2016

Read only filesystem

Symfony 2.0.

Kernel class

- create cache dir
 - create logs dir
- absolute path.
depending on
environment

⇒ But relative path
better !?

2014 ⇒ Relative path for cache
Stack directory names in array
and parse it for (..)

Symfony 3.2

Every caches have absolute path !

Read only cache

Cache
warmer

Symfony 3.2

Warm
ALL cache!
