

Beyond PSR-6

Symfony 3.2

Adapters:

- PdoAdapter
- PhpArrayAdapter PHP static array in shm
- PhpFileAdapter PHP small array in shm.
- NullAdapter null adapter for tests.

Tags based validation!

cache.system = PHP7 array > APCu > Files.

PHP
invented!
1994

Making your application
work through
interoperability

Zend

~~PHP~~

Symfony

~~PHP~~

WordPress

Divided Community!

and happened:

↳ Composer

↳ OOP

↳ Packagist

↳ PHP Fig

What is the fix?

→ PHP Congress
ONU PHP

creates

PSR

PSR 3 → Logging

PSR 11 → Container.

... and so on

Interoperability

- Library
- Decoupled business logic
-

Switch
blows

DEPENDANCY

HELL

with ≠
library

Abstraction via
PSR for everything!
